Ethan Tran

Montreal, QC, Canada | 438-389-5103 | ethan.tran@mail.mcgill.ca | linkedin.com/in/-ethantran- | github.com/tran-ethan

Education

McGill University **Aug 2024 – May 2028**
Bachelor of Engineering, Computer Engineering *Montreal, QC*

- GPA: **3.96 / 4.00** | Dean's Honour List (**top 10%** of faculty)

Vanier College **Aug 2022 – Jun 2024**
DCS, Computer Science and Mathematics *Montreal, QC*

- Graduated with Dean's Honour Roll (2023, 2024)
- Computer Science Tutor for *Intro to Programming* and *Data Structures and Object-Oriented Programming* in Java

Experience

Royal Bank of Canada **May 2026 – Aug 2026**
Software Developer Intern, Amplify *Montreal, QC*

- Built an agentic KYC onboarding platform for Capital Markets to automate compliance document collection, data extraction, and validation using React, TypeScript, Python, FastAPI, PostgreSQL, LlamaCloud, and S3
- Reduced manual review time per onboarding case by **80%** through an AI-powered document processing pipeline
- Projected to save **64,000 hours** annually by automating up to **8,000** onboarding cases, with freed analyst capacity estimated to generate **$80M** in incremental annual revenue
- Architected relational SQL schemas powering a compliance rules engine that dynamically cross-references client attributes against a library of document and data requirements, eliminating manual policy lookups
- Shipped the platform end-to-end in a 4-person team and presented it to **C-suite** executives through RBC Amplify

Intact Financial Corporation **May 2025 – Dec 2025**
Backend Software Developer Intern *Montreal, QC*

- Engineered broker workflows in Java, Spring Boot, and Maven enabling data transfers between third-party broker software and Intact services for **150,000+** monthly prospective clients
- Contributed to a large-scale modernization effort by migrating legacy SOAP-based services to REST APIs
- Took initiative to fix and accelerate regression analysis by developing Python scripts to automate repetitive tasks, uncovering **200+ regression failures** and reducing manual analysis time by **10 hours/week**
- Improved testing reliability by writing JUnit, Mockito, and Cucumber test suites for unit, integration, and regression testing, validating API endpoints and accurate data operations between legacy and modernized systems

Leadership

Hack4Impact McGill **Feb 2025 – Present**
Tech Lead *Montreal, QC*

- Led the development of a grants management platform using React, TypeScript, Next.js, PostgreSQL, Supabase, and Prisma for a nonprofit day shelter serving **1,000+** meals daily to Montreal's unhoused population
- Designed and implemented relational database schemas using PostgreSQL and Supabase to model grants, funding allocations, and the distribution of **multi-million-dollar** government funding across the organization's programs

Claude Builder Club McGill **Aug 2025 – Present**
Co-founder & Vice President Operations *Montreal, QC*

- Launched Quebec's first **Anthropic**-backed Claude Builder Club, a student community for AI fluency
- Led planning and logistics for the club's inaugural hackathon, coordinating club members across event operations to host **150+** participants from across Canada and secure **$5,000+** in sponsorship

Projects

Sign Atlas | *React, TypeScript, Next.js, Vercel, Three.js, MediaPipe* **Apr 2024**

- Won **first place** overall at the MariHacks 2024 hackathon among **200** participants
- Deployed a web app on Vercel using React and Next.js that helps people learn and practice American Sign Language
- Used Google's MediaPipe model for gesture recognition and Three.js to render interactive 3D hand models

Replex | *React Native, JavaScript, Expo, MoveNet* **May 2024**

- Won **first place** overall at the JACHacks 2024 hackathon among **100** participants
- Created a mobile app using React Native and Expo that helps users follow their custom workouts by tracking their exercises, sets, and reps using computer vision and Google's MoveNet pose estimation model

Fire Guard | *Scikit-learn, Python, Pandas, Flask, Jupyter Notebook, Svelte* **Aug 2024**

- Trained machine learning models for wildfire classification using climate data with Scikit-learn and Pandas
- Built a web-based interactive map for visualizing wildfire predictions and showing historical wildfires alongside weather data using Svelte and Flask as part of an 8-week intensive R&D program

Technical Skills

Languages: Python, Java, TypeScript, JavaScript, SQL, C, C++, HTML, CSS
Frameworks/Libraries: Spring Boot, FastAPI, React, Next.js, Node.js, Vue, Prisma, JUnit, Mockito, Cucumber
Cloud/Data/Tools: Git, Docker, PostgreSQL, GitHub Actions, S3, Supabase, Maven, Gradle, REST, SOAP
Interests: Climbing, Piano, Languages, Tennis, Badminton, Running, Fitness
